1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN

A. Accounting Practices

The Standard Life Insurance Company of New York (the “Company”) commenced business in October 2000. The Company currently markets group life and accidental death and dismemberment insurance, group and individual accident and health insurance products, and group dental and group vision insurance in New York through brokers and its own representatives.

The accompanying statutory basis financial statements of the Company have been prepared in conformity with accounting practices prescribed or permitted by the New York State Department of Financial Services (“Department”). Only statutory accounting practices so prescribed or permitted by the Department can be used in determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under New York Insurance Law.

The National Association of Insurance Commissioners’ (“NAIC”) Accounting Practices and Procedures Manual, (“NAIC SAP”), including the Statements of Statutory Accounting Principles (“SSAP”) as updated by the NAIC, has been adopted with some exceptions by the Department.

A reconciliation of the Company’s net income and surplus between the NAIC SAP and practices prescribed and permitted by the State of New York is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

There was no significant change in the use of estimates for the first nine months of 2017.

C. Accounting Policy

(6) Loan-backed and structured securities are carried at either amortized cost or the lower of amortized cost or fair value in accordance with the provisions of SSAP No. 43R – *Loan-backed and Structured Securities*. For loan-backed and structured securities, the effective yield is based on estimated cash flows, including prepayment assumptions based on data from widely accepted third-party data sources. Significant changes in estimated cash flows from the original purchase assumptions are accounted for using the prospective method.

D. Going Concern

Based on management’s evaluation, there is no substantial doubt about the Company’s ability to continue as a going concern.

2. ACCOUNTING CHANGES AND CORRECTION OF ERRORS

Accounting Changes

SSAP No. 26 – *Bonds* and SSAP No. 43R – *Loan-Backed and Structured Securities* were revised to require the amount of prepayment penalty and/or acceleration fees to be reported as investment income instead of realized gains or losses. The amount to be reported as investment income is equal to the total proceeds (consideration) received less the par value of the investment. Any difference between the book adjusted carrying value and the par value at the time of disposal is to be reported as realized capital gains and losses. This revision became effective as of January 1, 2017 on a prospective basis and was adopted by the Company. The Company does not expect the revision to SSAP No. 26 and SSAP No. 43R to have a significant impact on its financial position, results of operations or cash flows.

SSAP No. 35R – *Guaranty Fund and Other Assessments* was revised relating to guaranty fund credits for short-duration contracts. Expected renewals of short-term health contracts are to be considered in determining the assets recognized from accrued guaranty fund liability assessments. For retrospective-premium-based and loss-based assessments, in-force policies will not include expected renewals of short-term contracts except in cases when retrospective-premium-based assessments are imposed on short-term health contracts for the insolvencies of insurers that wrote long-term care contracts. To the extent that it is probable that accrued liability assessments will result in a recoverable amount in a future period from business currently in force, appropriate renewal rates of short-term health contracts will be taken into consideration when recognizing the asset. For prospective-premium-based assessments, the recognition of assets from accrued liability assessments is limited to the amount of premium an entity has written or is obligated to write and to the amounts recoverable over the life of the in-force policies. For short-term contracts subject to long-term care assessments, appropriate renewal rates may be considered in evaluating recoverability of premium tax offsets or policy surcharges. The revision became effective January 1, 2017 and was adopted by the Company. The Company does not expect the revision to have a significant impact on its financial position, results of operations or cash flows.

SSAP No. 35R – *Guaranty Fund and Other Assessments* was revised to require discounting of liabilities and assets related to long-term care guaranty fund assessments. Liabilities from guaranty funds or other assessments from the insolvencies of companies that wrote long-term care contracts that extend in excess of one year to payment are to be discounted as described in SSAP No. 35R. If the liability is prefunded in full in the year of the insolvency it is not to be discounted. The discount period, based on the expected dates for payment will be determined on the basis of jurisdiction. Premium tax credit assets recognized from accrued and paid long-term care assessments are also required to be discounted when the time to forecasted recoverability is in excess of one year. Premium tax credit assets are to be discounted if recoverability exceeds one year even in instances when the related liability is not discounted. Determination of the time to recoverability for application of the discount period shall be on the basis of jurisdiction. The revision became effective January 1, 2017 and was adopted by the Company. The Company does not expect the revision to have a significant impact on its financial position, results of operations or cash flows.

SSAP No. 103R – *Transfers and Servicing of Financial Assets and Extinguishments of Liabilities* was revised to include short sales in statutory accounting guidance. For statutory accounting purposes, a short sale is defined as the sale of a security that the selling reporting entity (seller) does not own at the time of sale or a sale which is consummated by the delivery of a security borrowed by, or for the account of, the seller. The seller later closes out the position by returning the borrowed security to the lender, typically by purchasing securities on the open market. The guidance in SSAP No. 103R applies to the reporting entity if state regulations do not prohibit selling securities short or otherwise provide specific guidance. If the reporting entity is involved in selling a security short, the obligation to deliver the security involved is reported as a contra-asset in the applicable investment schedule and includes an investment code detailing the item as a short sale. The contra-asset is originally to be reflected at fair value, with changes in fair value recognized as unrealized gains or losses. The gains or losses will be realized upon settlement of the short sale obligation. The revision became effective January 1, 2017 and was adopted by the Company. The Company does not expect the revision to have a significant impact on its financial position, results of operations or cash flows.

Fixed Maturity Securities

Fixed maturity securities were comprised of the following classes:

- U.S. government.
- U.S. special revenues.
- Industrial and miscellaneous (unaffiliated).

The fixed maturity securities are diversified across industries, issuers, and maturities. The Company calculates fair values for all classes of fixed maturity securities using valuation techniques described below. They are placed into three levels depending on the valuation technique used to determine the fair value of the securities.

The Company uses independent pricing services to assist management in determining the fair value of these assets. The pricing services incorporate a variety of information observable in the market in its valuation techniques, including:

- Reported trading prices.
- Benchmark yields.
- Broker-dealer quotes.
- Benchmark securities.
- Bids and offers.
- Credit ratings.
- Relative credit information.
- Other reference data.

The pricing services also take into account perceived market movements and sector news, as well as the terms and conditions of a fixed maturity security, including any features specific to that issue that may influence risk, and thus marketability. Depending on the security, the priority of the use of observable market inputs may change as some observable market inputs may not be relevant or additional inputs may be necessary.

The pricing services provide quoted market prices when available. Quoted prices are not always available due to market inactivity of a fixed maturity security. The pricing services obtain a broker quote when sufficient information, such as security structure or other market information, is not available to produce a valuation. Valuations and quotes obtained from third party commercial pricing services are non-binding and do not represent quotes on which one may execute the disposition of the assets.

The significant unobservable inputs used in the fair value measurement of the Company's fixed maturity securities are valuations and quotes received from analytical reviews and broker quotes. Significant increases or decreases in any of those inputs in isolation would result in a significantly lower or higher fair value measurement. Generally, a change in the assumption used for the pricing evaluation is accompanied by a directionally similar change in the assumption used for the methodologies.

The Company performs control procedures over the external valuations at least quarterly through a combination of procedures that include an evaluation of methodologies used by the pricing services, analytical reviews, back testing of sales activity and maintenance of a list of fixed maturity securities with characteristics that could indicate potential impairment. As necessary, the Company compares prices received from the pricing services to prices independently estimated by the Company utilizing discounted cash flow models or through performing independent valuations of inputs and assumptions similar to those used by the pricing services in order to ensure prices represent a reasonable estimate of fair value. Although the Company does identify differences from time to time as a result of these validation procedures, the Company did not make any significant adjustments as of September 30, 2017 or December 31, 2016.

Commercial Mortgage Loans

For disclosure purposes, the fair values of commercial mortgage loans were estimated using a discounted cash flow valuation. The valuation included both observable market inputs and estimated model parameters.

Significant observable inputs to the valuation include:

- Pricing for loans originated by StanCorp Mortgage Investors during the most recent quarter.
- U.S. Government treasury yields.
- The contractual terms of nearly every mortgage subject to valuation.

Significant estimated parameters include:

- The use of risk characteristics including stabilized debt coverage ratio and loan-to-value ratio.
- Variations in valuation spread between loans based on individual risk characteristics.

Valuations for commercial mortgage loans measured at fair value on a nonrecurring basis using significant unobservable Level 3 inputs are sensitive to a number of variables, but are most sensitive to net operating income and the applied capitalization rate. Generally, an increase or decrease resulting from a change in the stabilized net operating income from the collateralized property would result in a directionally similar change in the fair value of the asset. An increase or decrease in the assumption for the capitalization rate would result in a directionally opposite change in the fair value of the asset.
